

## How to install MaxTRAQ 2D with Sentech Camera

Download and install Sentech Camera Drivers www.innovision-systems.com/Downloads/Products/Sentech/StCamSWare x64.exe

Download and install Sentech Camera Support for MaxTRAQ www.innovision-systems.com/Downloads/Products/MaxTRAQ/2D/SentechUSB.exe

Download and install MaxTRAQ 2D www.innovision-systems.com/Downloads/Products/MaxTRAQ/2D/mtsetup.exe

Once the software has been installed, start MaxTRAQ and select New Recording from the File Menu. This will take you to the recorder view.

- 1. Select Sentech USB as the Camera Type
- 2. Select the camera you want to use
- 3. Select Resolution and Frame Rate

Camera	Camera Type		
Sentech USB

Camera Info			
Ö	Stop Recording	After	
30	Frames 1	Sec	
Compre	ssion		
<no compression=""></no>			
100			

4. Click on the viewer button to start live viewing and then click on Camera Controls button and adjust Shutter and Gain

5. Click on Camera Setup.

File Streaming	Off
Circular Buffer	Off
Memory Buffer Size (74.53 s)	1 GB 🗾 💌
Sync Mode	Master 💽
External Trigger	Off
Record Enable	Off
Rotate Image	Normal 💌
Mirror Image	Off
Use Skipping	On
Use Custom Resolution	Off

- Select memory buffer size 1 GB
- Sync Mode Master

You can adjust recording time by clicking on Stop Recording After. By default, MaxTRAQ will record until you click stop.

Note; Compression should be set to <No Compression>

To control MaxTRAQ recordings, select Options from the Tools Menu. Please refer to the help for an explanation of the recorder options.
